E: We have noticed that your educa

PROFILE

E: We also are aware that you are one of the top notch-notch⁹ students of the academic world, especially on the stage where you have won the National Scholarship in 2017.

E: How has history influenced o

East China Normal University welcomed a fresh group of vigorous freshmen students for the 2017 fall semester. Circlejournalists organized interviews with four of those freshmen. So let's see what interesting events occurred on the first day of college.

First Day of College

First Day of College

ECNU Circle: What did you know about ECNU before you arrived to the university?

Xu Chi: I knew ECNU was a very famous university in Shanghai. I had heard that the campus was very beautiful and the teachers were very good. I was very excited to come here.

E: What is the most impressive thing in your campus life so far?

X: The most impressive thing is the beautiful campus and the friendly teachers. I like the atmosphere here very much.

E: What do you look forward to in the following four years?

X: I look forward to learning more about my major and making friends with my classmates. I hope I can become a professional in my field.

Chi Xu majors in Electronics Information.

Tan Ruiwen is from International College of Chinese Studies.

Tan Ruiwen: I came to ECNU from the International College of Chinese Studies. I was very interested in Chinese culture and language. I was very happy to come here and study Chinese.

E: What is the most impressive thing in your campus life so far?

T: The most impressive thing is the beautiful campus and the friendly teachers. I like the atmosphere here very much.

E: What do you look forward to in the following four years?

T: I look forward to learning more about my major and making friends with my classmates. I hope I can become a professional in my field.

ECNU Circle: Would you please briefly introduce the National Undergraduate Electronics Design Contest?

self-training due to the resources and structure of this contest.

Yan Xin: The contest holders design six to seven questions about electronics design annually, and as the competitors we chose one of the questions we thought we could solve. Not just theoretically, but one we could ultimately provide a practical solution. As a three-member team we had IRXU GD\V DQG WKUHH QLJKW 1H[W WKH VROXWLRQ DQG LW and mailed to the contest committee for evaluation

E: Do all these solutions apply to daily life circumstances?

WKH VROXW
ZDV SDFND

E: Can you explain to us what the process of the contest is like?

Zhou Jiahui: The process is actually very long and complicated. The provincial contest starts with R² WKH UVW URXQG RI WKH FRPSHWLWLRQ ZKHUHE\ best teams are selected to advance to the second round. Subsequently an 8-hour evaluation ensues where all the teams in the contest up to this point, in an enclosed environment, are required to solve a newly given question—that is, without any access to electronic devices or the World Wide Web. The final contest evaluation consists of three parts: the product of the first round, the comprehensive evaluation, and the final report. The aggregate

Z: Yes. The sponsors considered most practical matters upon formulating these questions. We even believed that these questions are an integral part of the national projects formed by the national government.

DOO WKUHH SDUWV PDNHV XS HEDFOLWYHODP\ and LQDOYR Thereupon a national retest goes into effect so that any factors caused from different provincial standards can be excluded from evaluations.

E: Why did you want to attend this contest?
Y: The reason why electronics fascinated me is that it puts theories into practice. Furthermore, the school provided a ZLWK PDQ\ VRXUFHVHOLQDE\VLQ SURJUDPP outlay and instrument. So I get more chances for responsible for electrical circuiting problems
